

PULLED, SOLD BACK, REPACKAGED

Three crypto card gacha sites that sell randomized packs of graded cards with an instant cash buyback: Collector Crypt, Phygitals and Courtyard.

COLLECTOR CRYPT

95.9%

of \$500+ pulls sold back to the house
on-chain sample of 1,000 of 68,891,
±3.1 pts, Jun 24 to Sep 15

9 s

median time from pull to sell-back
same sample; 38% bought back before
delivery

95.8%

same slab pulled again by Sep 30
68,891 pulls, Jun 24 to Sep 15

15.0

pulls per \$500+ slab
81,127 pulls, Jun 24 to Sep 30

phygitals

93.1%

of \$500+ pulls sold back to the house
all 6,927 pulls, on-chain, Jun 24
to Sep 15

20 s

median time from pull to sell-back
6,452 sell-backs

92.9%

same slab pulled again by Sep 30
6,927 pulls, Jun 24 to Sep 15

11.4

pulls per \$500+ slab
11,539 pulls, Jun 24 to Sep 30

Courtyard

80.8%

of \$500+ pulls sold back first
all 28,009 pulls, on-chain, Jun 24 to
Sep 23

50 s

median time from pull to sell-back
22,626 sell-backs, block-interpolated

77.8%

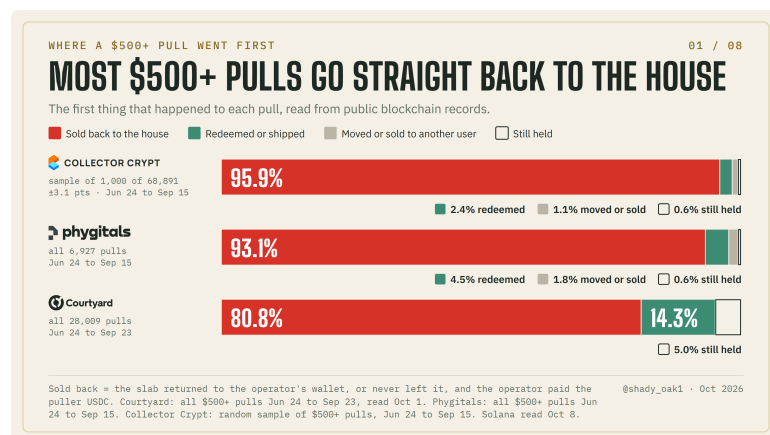

same slab pulled again by Sep 30
26,210 pulls, Jun 24 to Sep 15

4.2

pulls per \$500+ slab
29,704 pulls, Jun 24 to Sep 30

66.2 / 55.8 / 61.1%

of \$500+ pulls on Collector Crypt / Phygitals / Courtyard were priced above CardLadder (122,219 pulls, Jun 24 to Sep 30). Above CardLadder and every sale in the prior 30 days, of pulls with an earlier recorded sale: 22.6 / 29.2 / 13.8%, with the Phygitals figure inflated by thin sales (22.1% counting only pulls with a sale that month).

Where a \$500+ pull went first. Full chart set in the report.

METHOD

Sources: public live pull feeds the sites publish, CardLadder values and sales, and public blockchain records. Pulls of the same slab are matched by grading cert number.

Courtyard: every \$500+ pull's token transfers read on Polygon; 400 of 400 random cases matched Courtyard's own history. Collector Crypt: random on-chain samples per price tier; Phygitals: every \$500+ pull. 40 of 40 sampled results matched when re-read and decoded independently.

Re-pulls not in the dataset are not counted, so recycling figures are minimums. CardLadder is an estimate.

Disclosure: the author trades on these platforms with their own tools.
